May 21, 2021

The University of Virginia (UVA) intends to return to fully residential learning for the upcoming 2021-22 academic year. The University of Virginia will require that all students who live, learn, or work in person at the University during the next academic year (2021-2022) must be fully vaccinated before returning to Grounds, starting July 1, 2021. Students must upload proof of vaccination to the University’s HealthyHoos Patient Portal no later than Thursday, July 1, 2021. This approach will enable our students to return to a residential academic setting where they can live, study, and gather together safely.

Any measure that will expedite vaccination prior to arrival at UVA will be enormously appreciated by the University community.

Sincerely,

Richard Tanson
Sr. International Advisor
For the International Student & Scholar Programs team
